

Theophany

Sub1-10" / Sub1-12"

Sub1-12"

Sub1-10"

Sub1-10" / Sub1-12"

Theophany loudspeakers are a culmination of technology and hand-craftsmanship that provide an incredible and emotive listening experience suitable for both Hi-Fi and Home Theatre.

Both the Sub1-10" and Sub1-12" have down-firing woofers allowing for versatile room placement and sound integration. When positioned correctly in a room it is often hard to identify where the sound is coming from.

The Sub1-10" has a 10" 900 Watt driver and a 350 Watt amplifier. The Sub1-12" utilises the same powerful amplifier but a 12" 1200 Watt driver. Both woofers have a fast transient response and so are very musical. Because all of our speakers have such excellent bass extension we recommend only utilizing the subwoofer up to 60Hz. This offers superior system integration as well as fast tight bass control between 20 and 60Hz, improving the overall experience with both music and movies.

Both models offer excellent tight musical bass as well as phenomenal punch for movies that require the best in Low Frequency Effects. We recommend the sub1-10" for use in rooms from 32 to 150 cubic metres. The sub1-12" will easily fill any room up to 220 cubic metres. A dual subwoofer configuration should be considered for larger rooms.
