Why Theophany?

Theophany speakers represent a new concept in loudspeaker design.

Theophany loudspeakers are a culmination of technology and hand-craftsmanship that provide an incredible and emotive listening experience suitable for both Hi-Fi and Home Theatre.

The cabinets are made from the highest quality materials. They are laminated at moderate temperatures and very high pressure.

This allows us to build extremely inert cabinets which provide very realistic and emotionally stirring sound reproduction.

The curved cabinets eliminate harmonic distortion and standing waves, thus improving efficiency. The aerodynamic profile streamlines airflow around the cabinet improving overall response.

A curved front panel eliminates mechanical distortion generated from the drivers.

An angled front provides precise phase alignment of the tweeter and front woofers giving extremely accurate and precise imaging as well as improving overall smoothness.

Neodymium magnets are used in both the tweeter and woofer allowing us to improve transient response (attack) and reduce distortion, especially in the first 100 milliseconds when it is critical in creating sound reality.

Become a part of this exciting sound revolution today.

"Sound as God intended"
