C5

C3 / C5

Theophany loudspeakers are a culmination of technology and hand-craftsmanship that provide an incredible and emotive listening experience suitable for both Hi-Fi and Home Theatre.

The centre speaker is often the most forgotten speaker. 70% of sound is transmitted via the centre speaker during 5.1 movie and music reproduction. This means that it is essential to incorporate a balanced and suitable centre speaker. This is often the first place to start when considering a system upgrade.

C3

A lovely compliment to the M3's this is an excellent option when you have a music system that is used for occasional home theatre. The off-axis response is very good as is the detail and presence, both which are essential for good speech and music reproduction.

40Hz – 27kHz +/- 3db | 150 Watts RMS | 6 ohm | 89db efficient

C5

The winner of the prestigious Tone Magazine Gold Award and said to be possibly the best the reviewer has ever heard. The C5 is quite remarkable! With a curved front and dual tweeter design the C5 offers unrivaled off-axis response ideal in wide or large rooms. Both music and theatre will be a delight. Excellent accompaniment to the M5's or M3's.

38Hz – 27kHz +/- 3db | 180 Watts RMS | 6 ohm | 89db efficient

S3

The S3 can also be used as an excellent centre speaker where a more compact design is required. Comparable in most aspects to the C3, but slightly better with music.
